

QS3250r

Roll-to-Roll Productivity, High-Definition UV Quality, VUTEK Reliability

The VUTEK® QS3250r from EFI™ is the second-generation roll-to-roll UV-curing printer to come from the award-winning, and industry-leading family of VUTEK QS printers. The QS3250r combines the High-Definition Print (HDP) capability and high production speeds in a single UV roll-to-roll device, making it the ideal printer for sign shops and commercial printers upgrading to UV output with enhanced quality and versatility. Best of all, it's from VUTEK, the leader in superwide format printing.

The VUTEK DNA makes your business more productive, profitable and successful now and for generations to come. The printer comes with a host of advantages including:

- Quality resolution up to 1080 dpi.
- Brilliant eight color imaging switchable to Fast-4 imaging for high quality, high-speed output.
- Speeds up to 1850 square feet (172 square meters) per hour.
- Optional Automated Double-sided Printing feature that enables near perfect registration.

Vertically Integrated Inks Deliver Reliable, Durable and Repeatable Color Every Time

EFI inks are optimized to work on the VUTEK QS3250r, delivering maximum printer reliability, efficiency and performance. The inks also come in the widest color spectrum for accurate color matching, enabling the VUTEK QS3250r to get the most consistent, repeatable colors across multiple runs. The inks also provide the highest color quality and durability on an expanded variety of flexible substrates.

EFI Gives You an Extra Edge Over the Competition

EFI's holistic approach to digital printing gives you the highest return on investment with integrated technology, workflow, inks, services and training. Our approach optimizes your production, increases your profitability and decreases your overhead costs, waste and manpower now and in the future.

Simplify your life by working with one vendor to meet all your printing needs, whether it's training, services or using other integrated solutions such as EFI Digital StoreFront®, Pace™, PrintSmith™, Fiery® XF and XFlow.
